Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rubio et al U.S. Patent 5,678,357.

Rubio et al disclosed an inflatable play structure (12) having a slide (front ramp), the structure is inherently at least 4.8 meters so that it could support children; a wind passage (15) inherently having a vertical cross section area of at least 0.5 square meters in order to allow children to enter and/or exit (claim 1); the vertical cross-section of the passage (15) is circular cross-section (claim 3), also it would have been a matter of design choice to manufacture the passage (15) with triangular shape or any equivalence thereof to attract children's attention (claim 2); the slide having a pair of side walls that depending from a sliding surface; one of the side walls is adjacent to a climbing area (front section of base 13); and could be used as a railing for the climbing area (claims 6, 7).

Regarding claim 5, it is conventional to provide the passage (15) with a mesh or screen for the purpose of providing a closure for the passage.

Allowable Subject Matter

Art Unit: 3711

Claims 4, 8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
